1 Introduction

Figure 1-1 contains a suggestion or rather a sketch for a “level 1 – operational overview” for a water treatment control system. The sketch has been drawn with a tablet in Microsoft OneNote. An effort has been made to only display the important information with analog indications without drawing the plant. Colors are used sparingly and setpoints should not be changeable from the level 1 screen.

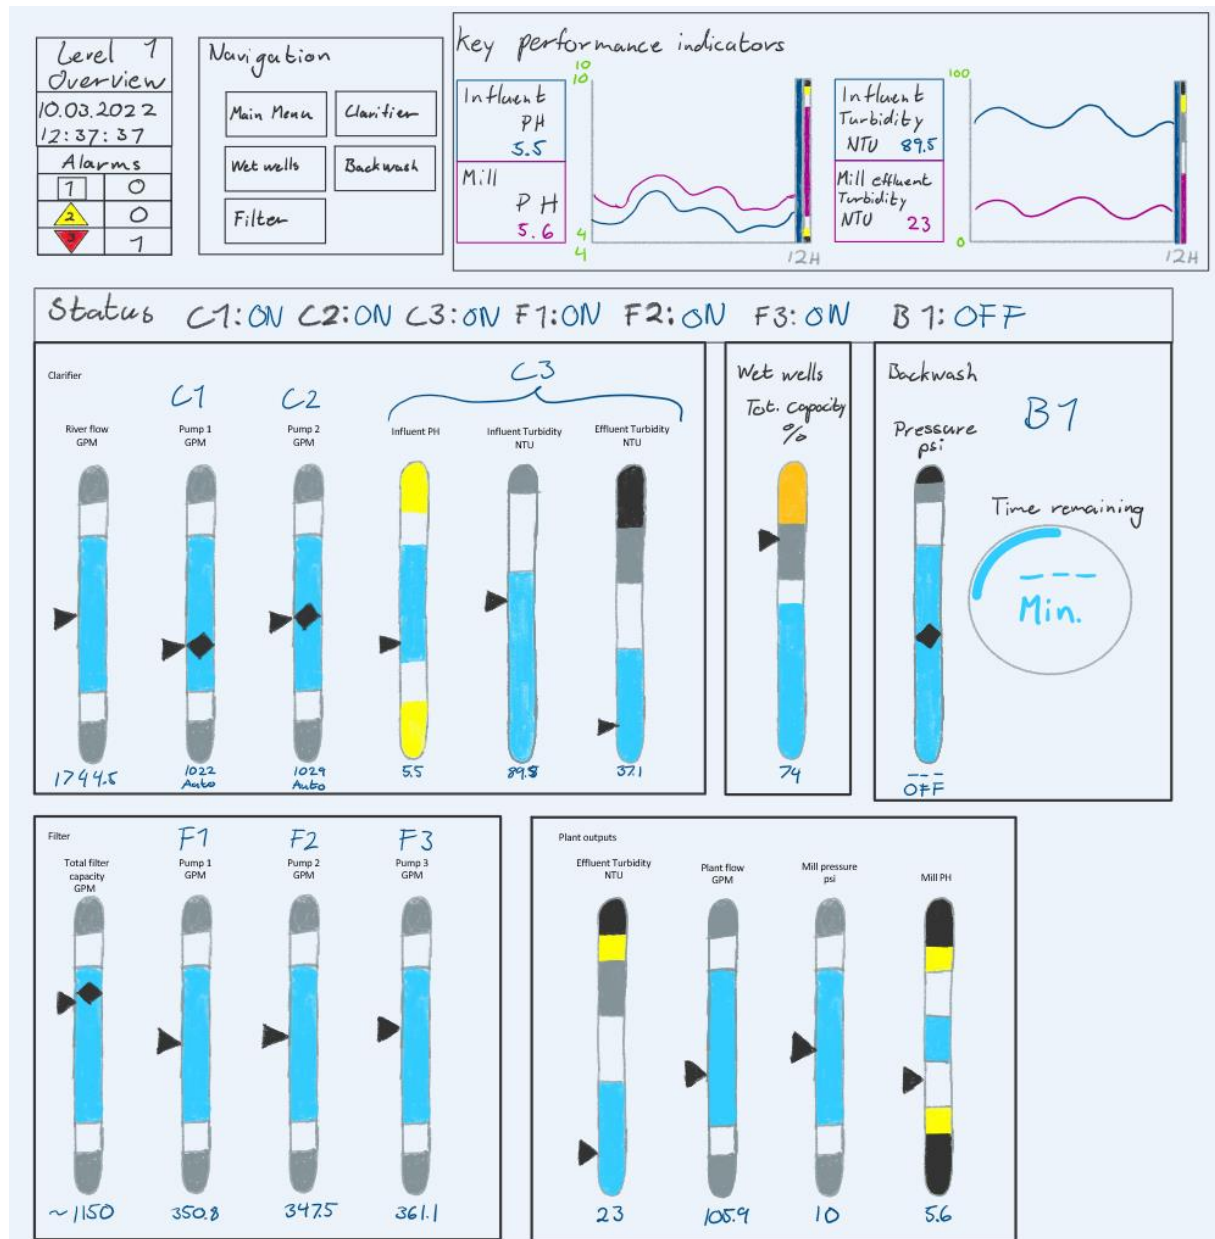

Figure 1-1 A suggestion / sketch of a level 1 operational overview.
